# A400 Xtreme

## KICK-OFF MEGA

A

### KICK-OFF MEGA

The new Kick-Off MEGA reduces recoil 60% more than any other shotgun of its kind on the market, and provides Xtreme comfort because the stock area that makes contact with the face remains stationary. Kick-Off MEGA and Kick-Off<sup>3</sup> are integral to the design of Beretta's A400 Xtreme and comes standard on all models.

## KICK-OFF<sup>3</sup>

B

Laboratory tests have shown two distinct peaks in recoil. The explosion of the ammunition is the first; the impact of the bolt against the receiver is the second. Kick-Off<sup>3</sup> is a third hydraulic damper that cushions this stress on the mechanical components and further reduces recoil by an additional 10% for a total recoil reduction of 70%.

## Micro Core

C

Micro-Core is an innovative recoil pad developed by Beretta with the benefit of decades of real-world experience. The techno-polymer material is softer and lighter than rubber and expands its surface area on the shoulder, giving the Xtreme secure and precise support.

## BLINK

D

Blink is the new "engine" of the Xtreme, and it is 36% faster than any other shotgun. Within the gas system, an innovative piston with an elastic scraper functions as a gasket, keeping the gun cleaner and making the Xtreme the most reliable shotgun available.

## //B-LOK

E

The new forend cap offers a safe and fast locking system that makes it easier to assemble and disassemble your shotgun. The cap is closed simply with a 60° rotation and a "click".

## AQUA TECHNOLOGY

F

Aqua Technology provides a corrosion-proof barrier which ensures all internal and external metallic components remain impervious to every extreme element you may encounter.

## STEELIUM

G

Beretta makes the best barrels in the world. Starting with proprietary tri-alloy steel (Ni/Cr/Mo), the metal goes through a unique manufacturing process. Deep hole drilling, cold-hammer forging, and vacuum distension create the very best ballistic performance available.

## OPTIMA BORE HP

H

Optima-Bore<sup>®</sup> HP geometry was conceived to offer the best ballistic performance available, even with steel shot. The shot pattern remains perfectly uniform whatever the shell size or load. Optima-Bore HP choke tubes further enhance the effect.

## THE FORECAST CALLS FOR REIGN!

Frigid rain, driving sleet, blinding snow and relentless salt spray—hardcore waterfowlers live to hunt in Xtreme conditions and so must their shotgun. Beretta's A400 Xtreme features Kick-Off MEGA's 70% recoil reduction, Blink's 36% faster cycling of any 12ga. load, and the exclusive Aqua Technology's corrosion proof barrier. These features combine to produce the Xtreme's never quit, show no mercy attitude that will reign in the most Xtreme conditions imaginable. **Know No Limits—Go Xtreme.**

# A400 Xtreme

**KICK OFF<sup>M</sup> KICK OFF<sup>3</sup>**

**70% Less recoil than the competition.**

Kick-Off Mega, a Beretta exclusive, provides the world's best recoil reduction while eliminating muzzle rise.

\* Kick-Off MEGA & Kick-Off<sup>3</sup> (Federal Premium Magnum Lead Turkey 12/76mm, 56g).

## UNICO

**Shoots all 12-gauge shotgun shells.**

The A400 Xtreme can shoot all 12-gauge loads from 2<sup>3</sup>/<sub>4</sub>" to 3<sup>1</sup>/<sub>2</sub>" with the same weight and balance of a high performance 3" shotgun.

**All 12 gauge loads in a single shotgun.**

### MAX-4 REALTREE CAMO

The pattern offers maximum effectiveness as waterfowl camo in any open terrain without geographical limitations. It is the most popular waterfowl camo on the market.

**Micro Core**

**Superior comfort and perfect shouldering.**

Micro-Core is an innovative new recoil pad produced from open cell techno-polymer that results in greatly enhanced recoil reduction and is softer and lighter than standard rubber.

**X**TREME DUCKERS.  
WE KNOW NO LIMITS.

## STEELIUM

### The ultimate barrel technology.

Beretta steel is deep hole drilled then meticulously forged with cold hammering and vacuum distension to create the most accurate, durable and consistent barrel available.

## OPTIMA BORE HP

### Shot pattern remains perfect and uniform in every type of hunting situation.

Optima-Bore® HP geometry was conceived to offer the best ballistic performance available even with steel shot. The shot pattern remains perfectly uniform whatever the shell size or load. Optima-Bore HP choke tubes further enhance the effect.

The versatility to shoot 2¾" to 3½" loads through a gun with the weight and balance previously found only on a high-performance competition shotgun.

## BLINK

### 36% faster than any other shotgun.

The innovative Beretta gas operating system is 36% faster than any other operating system. Featuring a rotating bolt, new feeding system and a self-cleaning piston, the A400 Xtreme possesses unmatched reliability, speed and performance.

**BERETTA**  
500 YEARS. ONE PASSION.

# A 400 **Xtreme**

## **A further step forward in performance. Soft, light and able to slide during shouldering.**

Micro-Core is an innovative recoil pad developed by Beretta, thanks to our experience gained over centuries on the competition and hunting fields around the world. The open cell techno-polymer is softer, lighter and slides better than rubber. Micro-Core expands, increasing its surface area on the shoulder and giving the shotgun secure and precise support.

**Able To Slide**

**Light**

**Adjustable**

**Soft**

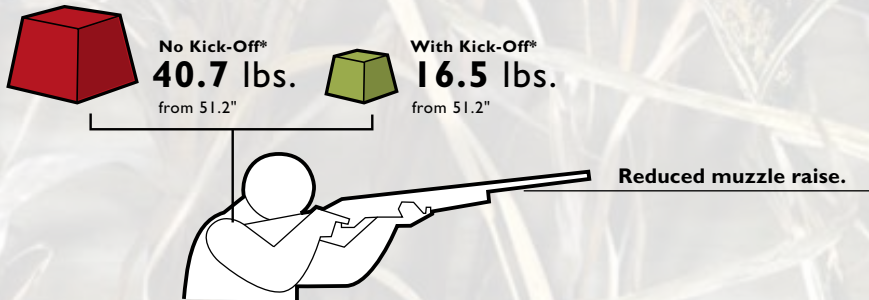

## **KICK-OFF<sup>3</sup>**

**The only device in the world that acts on the second recoil peak.**

Precise laboratory testing clearly demonstrated that recoil has two very distinct components: the explosion of the ammunition at the moment of firing (1st peak) and the impact of the bolt against the receiver at the end of its travel (2nd peak). Kick-Off<sup>3</sup> is a third hydraulic dampener that targets the 2nd recoil peak. In doing this, even the stress on the mechanical components is notably reduced, increasing the service life of the gun.

**Xtreme**

\*Kick-Off MEGA & Kick-Off<sup>3</sup> is standard on all Xtreme models.

**X**TREME DUCKERS.  
WE KNOW NO LIMITS.

**KICK // OFF<sup>M</sup>**

The world's most advanced recoil reduction, now MEGA! Kick-Off and Kick-Off<sup>3</sup> have revolutionized the world of recoil reduction, bringing the performance up to -70%. Now Kick-Off goes MEGA, giving hunters the maximum of comfort and control together. With Kick-Off MEGA, the gun recoils parallel to the cheek mount. These combined systems result in a substantial reduction in muzzle rise and less recoil, allowing for better follow-up shot control.

**KICK // OFF<sup>M</sup>**

**The best recoil reduction system  
in the world = 70% less recoil.**

The new Kick-Off MEGA reduces recoil 70% more than any other shotgun of it's kind on the market and provides Xtreme comfort because the stock area that makes contact with the face remains stationary. Kick-Off<sup>3</sup> and Kick-Off MEGA are integral to the design of Beretta's A400 Xtreme and comes standard on all models.

RECOIL REDUCTION

# A400 **Xtreme**

**36% faster** than any other semi-automatic.

The operating system of the A400 Xtreme is a true jewel of engineering that distinguishes itself from all other systems on the market with its exceptional cycling speed. Being the fastest to shoot follow-up shots means increasing your chances of hitting the target. With an A400 Xtreme anything is possible.

**Steel performance.**

**Steel technology.**

Steelium is the production technology of the Beretta barrels that transforms the special tri-alloy steel (A), into an exceptional barrel, due to a manufacturing process that is unique. Thanks to the deep drilling (B), cold-hammer forging (C), and to the special vacuum distension (D), the steel acquires the ideal characteristics to offer the best ballistic performance available today.

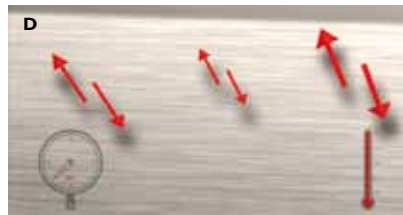

A

B

C

D

The special Optima-Bore® HP geometry was conceived to offer the best performance even with steel shot. The shot pattern remains perfect and uniform in every type of hunting situation, complemented by the use of the Optima-Choke® HP choke tubes.

**Fiber Optic Sight  
for Xtreme accuracy.**

**//B-LOK**

FAST-LOCKING IN A 60° ROTATION, THE NEW B-LOK FOREND CAP PROVIDES A PERFECT LOCK IN JUST A FRACTION OF A SECOND!

**Superior Corrosion Protection  
for Xtreme conditions.**

All internal parts are produced with rust-proof protective coatings. The slide, carrier and trigger are covered with anti-glare treatment. The receiver is made of anodized aluminum. The barrel bore is chrome-plated and external is blued. The barrel and receiver are protected through a special dipping treatment that shelters the gun from corrosion in all weather conditions. Even after 150 hours of saline fog, the treated barrel resists any corrosive effects.

**AQUA  
TECHNOLOGY**

**60° turn  
to lock**

For the waterfowler who enjoys his shotgun in basic black and prefers the durability and versatility of a synthetic stock, this sleek autoloading shotgun is the answer. The hammer-forged barrel is chrome lined for corrosion resistance and easy cleaning, while Beretta's self-compensating gas valve lets you shoot the full range of your favorite ammunition.

The Max-4 Realtree camo design features cattails, millet, milo, cornstalks, sunflowers, oak and maple leaves, cedar and oak limbs, and a variety of other plant life. The pattern offers maximum effectiveness as waterfowl camo in any open terrain—without geographical limitations.
